do economics and statistics succeed in explaining human social behaviour to answer this question leland gerson neuberg studies some pioneering controlled social experiments starting in the late 1960s economists and statisticians sought to improve social policy formation with random assignment experiments such as those that provided income guarantees in the form of a negative income tax this book explores anomalies in the conceptual basis of such experiments and in the foundations of statistics and economics more generally scientific inquiry always faces certain philosophical problems controlled experiments of human social behaviour however cannot avoid some methodological difficulties not evident in physical science experiments drawing upon several examples the author argues that methodological anomalies prevent microeconomics and statistics from explaining human social behaviour as coherently as the physical sciences explain nature he concludes that controlled social experiments are a frequently overrated tool for social policy improvement

this edited collection casts light on central issues within contemporary philosophy of mathematics such as the realism anti realism dispute the relationship between logic and metaphysics and the question of whether mathematics is a science of objects or structures the discussions offered in the papers involve an in depth investigation of among other things the notions of mathematical truth proof and grounding and often a special emphasis is placed on considerations relating to mathematical practice a distinguishing feature of the book is the multicultural nature of the community that has produced it philosophers logicians and mathematicians have all contributed high quality articles which will prove valuable to researchers and students alike

developed in partnership with the international political science association this must have authoritative political science resource in eight volumes provides a definitive picture of all aspects of political life

quantum structures and the nature of reality is a collection of papers written for an interdisciplinary audience about the quantum structure research within the international quantum structures association the advent of quantum mechanics has changed our scientific worldview in a fundamental way many popular and semi popular books have been published about the paradoxical aspects of quantum mechanics usually however these reflections find their origin in the standard views on quantum mechanics most of all the wave particle duality picture contrary to relativity theory where the meaning of its revolutionary ideas was linked from the start with deep structural changes in the geometrical nature of our world the deep structural changes about the nature of our reality that are indicated by quantum mechanics cannot be traced within the standard formulation the study of the structure of quantum theory its logical content its axiomatic foundation has been motivated primarily by the search for their structural changes due to the high mathematical sophistication of this quantum structure research no books have been published which try to explain the recent results for an interdisciplinary audience this book tries to fill this gap by collecting contributions from some of the main researchers in the field they reveal the steps that have been taken towards a deeper structural understanding of quantum theory
