thrilling a bracing summary of what we have learned from archaeogenetics the study of ancient dna krause and trappe capture the excitement of this young field kyle harper the wall street journal johannes krause is the director of the max planck institute for evolutionary anthropology and a brilliant pioneer in the field of archaeogenetics archaeology augmented by dna sequencing technology which has allowed scientists to reconstruct human history reaching back hundreds of thousands of years before recorded time in this surprising account krause and journalist thomas trappe rewrite a fascinating chapter of this history the peopling of europe that takes us from the neanderthals and denisovans to the present we know now that a wave of farmers from anatolia migrated into europe 8 000 years ago essentially displacing the dark skinned blue eyed hunter gatherers who preceded them this anatolian farmer dna is one of the core genetic components of people with contemporary european ancestry archaeogenetics has also revealed that indigenous north and south americans though long thought to have been east asian also share dna with contemporary europeans krause and trappe vividly introduce us to the prehistoric cultures of the ancient europeans the aurignacians innovative artisans who carved flutes and animal and human forms from bird bones more than 40 000 years ago the varna who buried their loved ones with gold long before the pharaohs of egypt and the gravettians big game hunters who were europe s most successful early settlers until they perished in the ice age genetics has earned a reputation for smuggling racist ideologies into science but cutting edge science makes nonsense of eugenics and pure bloodlines immigration and genetic exchanges have always defined our species who we are is a question of culture not biological inheritance this revelatory book offers us an entirely new way to understand ourselves both past and present

this book presents a concise yet comprehensive survey of methods used in the expanding studies of human evolution paying particular attention to new work on social evolution the first part of the book presents principal methods for the study of biological cultural and social evolution plus migration group behavior institutions politics and environment the second part provides a chronological and analytical account of the development of these methods from 1850 to the present showing how multidisciplinary rose to link physical biological ecological and social sciences the work is especially relevant for readers in history and social sciences but will be of interest to readers in biological and ecological fields who are interested in exploring a wide range of evolutionary studies

forster and marston have delivered a stellar book that attempts to present an exegetical and scriptural framework for the content presented in the book instead of beginning from a set of deductive theological assumptions and then attempting to support that system from scripture forster and marston examine scripture and attempt to build their case directly from the text the authors unabashedly admit that their views are very similar to those of arminian and weslyan traditions but they state in the beginning of the book that they do not want to be labeled with these names but want to construct a theology that is in line with the teachings of the first 300 years of christianity anyone who reads their appendix will come to understand that the teachings presented in this book were the orthodox consensus of the early church for the first 300 years and that it was augustine who introduced serious deviations into the mainstream orthodox christianity of his time forster and marston begin by describing the battle that is being waged between god and the spiritual forces that oppose him they examine the book of job and see how this relates to the overall struggle then the authors examine the 9th chapter of romans to see if this book is dealing with election and individual destinies or god s actions within human history the authors do an excellent job of arguing for their opinion that this chapter is speaking about god s involvement in human history and it deals with god s choosing of one nation or individual over another nation or individual to accomplish his purpose other sections of interest in this book are the sections on foreknowledge and predestination and the chapters on faith and works the section on faith and works was particularly interesting because it relies on much of the teaching of the new perspective which has shed much light on how a 1st century palestinian jew would have approached scriptural issues the research argumenation and exegesis in this book are solid so every chapter is excellent but the ones mentioned above were two of my favorites amazon com

this book is a study of modern politics from a socialist and left wing perspective as a collection of essays on political ideas it presents an analysis of the crisis of our times through examining the various crises and problems which define modern society it considers individual political aspects of the contemporary problems of capitalist politics ranging from economic crisis to social crisis from imperialism to the environmental crisis as such it serves to outline a solid argument for a better politics today the politics of socialism and democratic socialism

this is the third of three books that together provide an integrated picture of the aegean sea presenting the natural

components of the system book i and book ii as well as the human presence in the extended area book iii the aegean sea also called aegean archipelagos is an open complex and diverse marine system with different compartments and interactions divided into 6 parts this book begins with a historical perspective of the region as an important cradle of civilization connecting the eastern mediterranean sea to the black sea followed by an account of the natural resources natural hazards and economic activities in the region such as the potential of marine renewable energy capture fisheries and aquaculture the subsequent parts of the book explore the balance between tourism sustainable development and ecology in the aegean sea expert contributors review how human activities e g tourism fishing and energy production are threatening the marine systems and the impact they have on different ecosystems and the climate particular attention is given to the current state of pollution including topics such as the reconstruction analysis of radionuclides and metals for contamination assessment and coastal variability pollution from hydrocarbons and other organic contaminants as well as the pressing issue of marine litter plastics and microplastics in the aegean archipelago the book iii concludes with an overview of the national and international plans for the conservation of the aegean sea system and presents integrated guidelines and an outlook on the future of the region given the breadth and depth of its coverage the book offers an invaluable source of information for researchers students and environmental managers alike

a fascinating exploration of human history over the last ten thousand years

a wide ranging beautifully illustrated history of mermaids and mermen from the classics to cosplay people have been fascinated by merpeople and merfolk since ancient times from the sirens of homer s odyssey to hans christian andersen s the little mermaid and the film splash myths stories and legends of half human half fish creatures abound in modern times mermaiding has gained popularity among cosplayers throughout the world in merpeople a human history vaughn scribner traces the long history of mermaids and mermen taking in a wide variety of sources and using 117 striking images from film to philosophy church halls to coffee houses ancient myth to modern science scribner shows that mermaids and tritons are and always have been everywhere
