understanding non state actors aims to reduce the scarcity of academic literature on armed non state actors nsas that have always been a part of world politics and wars this monograph offers possibly for the first time a systematic historical review as well as a substantive theory of nsas and their arming efforts the world has been astonished by the ability of the well armed hamas to inflict heavy losses on the powerful israel thus from the jewish rebellion against rome to the war between the ukrainian separatists and the ukrainian government nsas weapons acquisition has been vital for the build up of their force enabling both the employment of that force and its sustainability while weapons are not necessarily

the most important factor in military build up nsas need weapons to fight and revolts usually erupt after the organizers have acquired a certain number of weapons conversely many revolts lose momentum and operations are not carried out or turn ineffective due to shortages of arms and ammunition a major theme of this monograph is that in spite of dramatic political and technological changes armed nsas in different periods have employed similar methods to acquire weapons self production looting and stealing external support and the arms trade were always the major ways for nsas to acquire weapons though the importance of each method and the type of arms has changed remarkably over time understanding non state actors discusses the factors political social cultural technological and organizational that have both facilitated and constrained the ability of nsas to acquire arms especially lecturers and students of military terrorism conflict studies war and peace studies will benefit from this study

the uprisings of 2011 have radically altered the political economic and social landscapes of the middle east and north africa a clearer view of the recent past now provides greater perspectives on the causes and the consequences of these events this collection of essays challenges the common tendency of applying the dominant frame of arab spring to explain contemporary politics of the middle east numerous debates about the utility of the arab spring metaphor already exist contesting such issues as its foreign origins or its temporal and optimistic implications it further has the negative and significant side effect of implying a singularity to these events in a manner that often defies the varied conditions on the ground this is why the term arab uprisings is used here as the organizing frame to address numerous socio cultural economic political experiential and communicative aspects of the uprisings this text is organized around three themes origins experiences and trajectories the first section addresses catalyzing factors that help explain the emergence of the uprisings from various political economic and socio cultural perspectives the second section examines the functions and responses of diverse people institutions and ideologies during the initial years of the uprisings it includes an in depth case study on women s changing political situation in the catalyzing country of tunisia as well as discussions

about the roles of political islam new mass media and social networks in these rapidly changing contexts the third section discusses cross national implications and the multitude of repercussion the uprisings are having on the global system using an interdisciplinary approach with contrasting theoretical and methodological orientations the global experts who contributed the chapters explore various theoretical approaches juxtaposing them with comparative surveys and in depth case studies they show that after the initial euphoria or dread that surrounded the uprisings a transitional and transformative period in the middle east has come that requires thorough observation and analysis

the routledge handbook of the history of the middle east mandates provides an overview of the social political economic and cultural histories of the middle east in the decades between the end of the first world war and the late 1940s when britain and france abandoned their mandates it also situates the history of the mandates in their wider imperial international and global contexts incorporating them into broader narratives of the interwar decades in 27 thematically organised chapters the volume looks at various aspects of the mandates such as the impact of the first world war and the development of a new state system the impact of the league of nations and international governance differing historical perspectives on the impact of the mandates system techniques and practices of government the political social economic and cultural experiences of the people living in and connected to the mandates this book provides the reader with a guide to both the history of the middle

east mandates and their complex relation with the broader structures of imperial and international life it will be a valuable resource for all scholars of this period of middle eastern and world history

the objective of this paper is to highlight the crucial importance of security sector reform during the challenging time of democratic transition many security services in arab countries do not utilize modern management practices or computer based administrative systems and lack human resources and career development departments let alone an inspector general s office to ensure discipline or an internal affairs section to address public complaints this paper argues that any sustainable governance reform of the social contract in arab countries in transition is inextricably linked to a new concept of the security sector based on good governance principles that could permeate a new political consensus profound institutional reforms and a new legal framework security services in these countries must change to serve the public rather than the political interest for the purpose of accountability efficiency and professionalism and in order to create a culture of institutionalization civilian oversight of the security sector is essential for their part new civilian leaders must ensure that the security sector receives proper equipment and an adequate budget particularly for salaries and training security sector reform in the arab region must be a cultural and ideological discussion rather than a merely technical one publisher s description
